

Vincent-George

Project name: Northcote Point Client: M & K

Brief: Garden design

OVERVIEW

This detached, three bedroom, bungalow was purchased by the current owners in 2020. They have since renovated the kitchen & open plan living space, along with freshening up the overall aesthetic of the property. They are now looking to replace the retaining wall at the front of the house and in-turn would like to consider options for the whole garden space at the same time.

The clients consider their aesthetic to be contemporary and minimal, preferring the use of neutral tones, black and white.

The key elements the garden must provide include:

- a front garden that ties in with the internal look of the house
- is easy maintenance
- creates a more defined and pleasing entrance
- enhances the decking & entertaining space already available

Light wood tones + black/white furnishings

Light concrete finishes + grasses

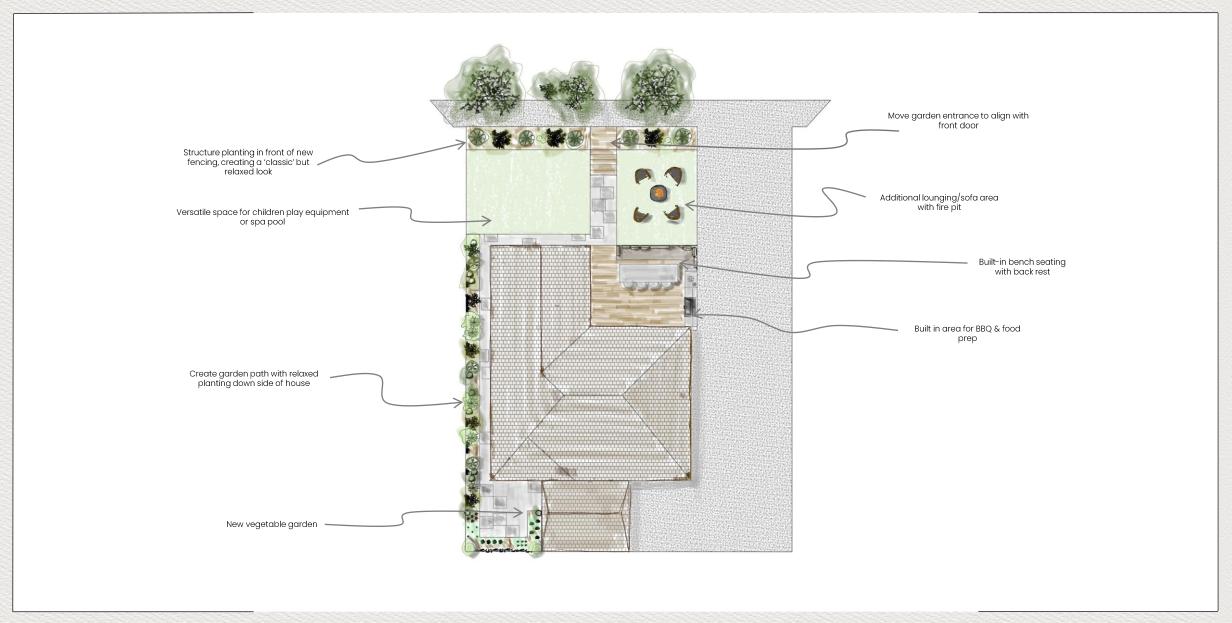

Vegetable garden

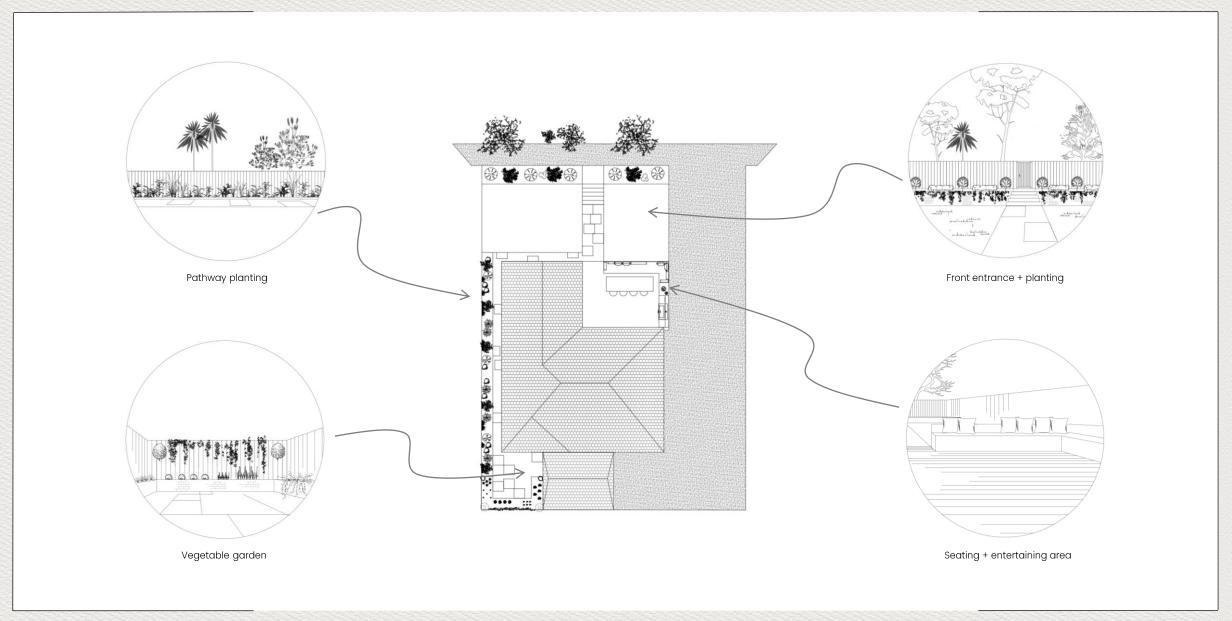

Mix of relaxed planting + box hedging for a combination of structure + fun

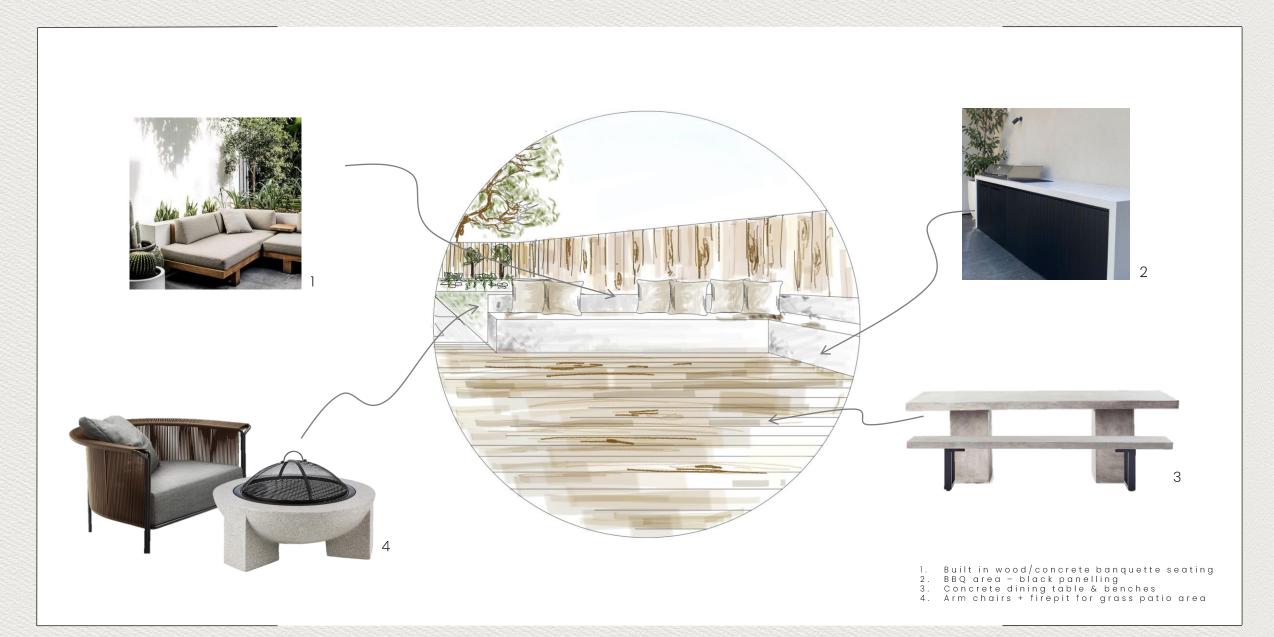

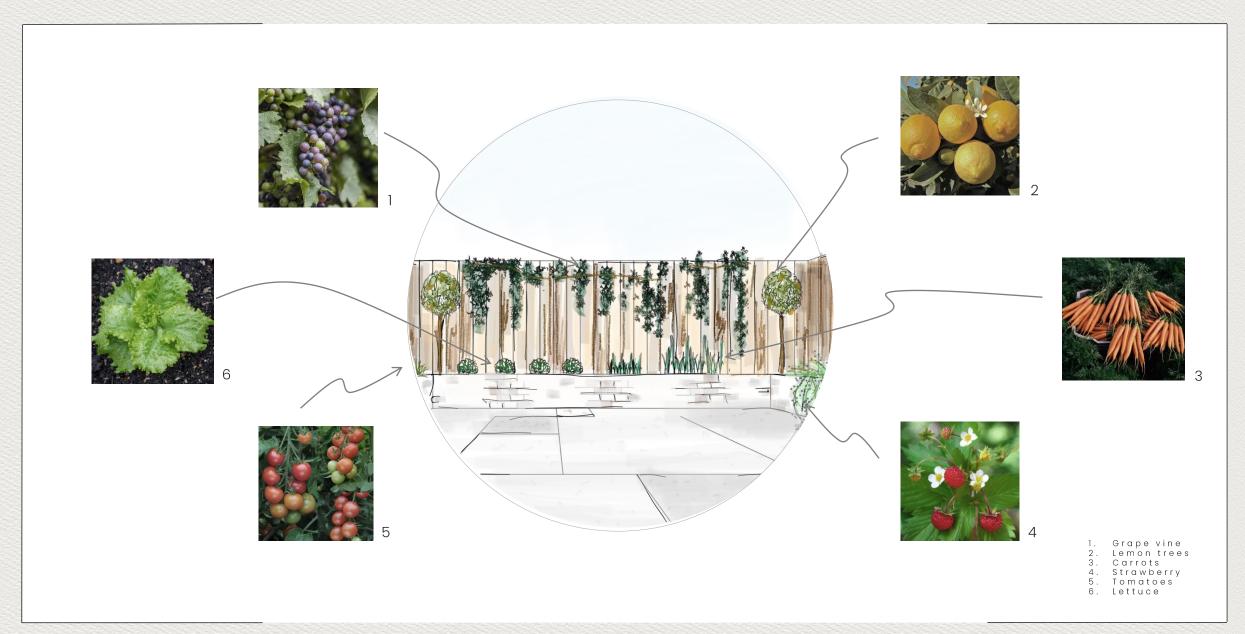

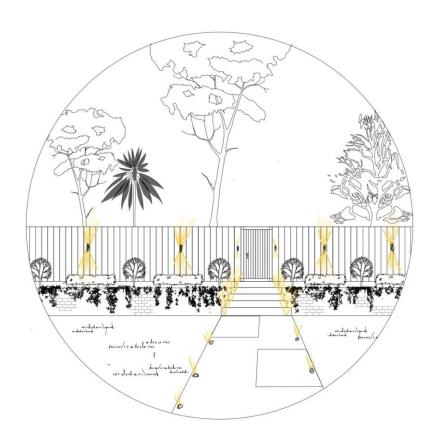

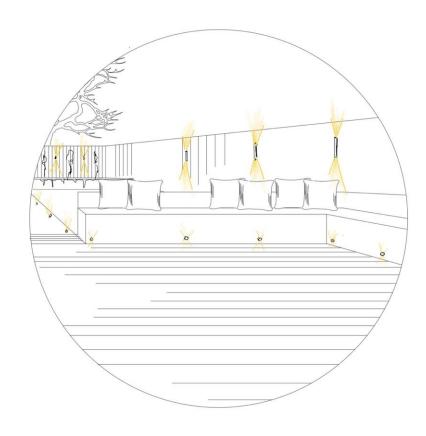

Front entrance + planting

Seating + entertaining area
